

NATIONAL RAILROAD PASSENGER CORPORATION (AMTRAK)**Reporting Mark:** AMTK

The Rail Passenger Service Act of 1970 created the National Railroad Passenger Corporation (which is more commonly known as Amtrak). This government corporation took over the operation of passenger trains from the freight railroads. Today, Amtrak operates long-distance and state-supported trains as well as service in the Northeast Corridor. (Source: history.amtrak.com) ¹⁰⁰¹⁻⁰

Major changes as of late 2020:

- Amtrak is anticipating acceptance of 75 new Siemens ALC-42 Chargers beginning in mid-2021 with the order expected to be completed by 2024. At press time the roster slots had not been assigned. Artwork of the livery has featured numbers in the 300 range. We have listed these numbers as a possibility.
- A number of P42DCs are not currently operational but may be returned to service. Their roster numbers are listed here.
